Features and Benefits

Stanley's Underwater GR29 Grinder can be used for grinding and cleaning with cup or standard grinding wheels, wire or nylon brushes.

The **integral Stanley Hyrevz™** gear motor is manufactured to exacting standards to deliver maximum efficiency.

There are **two positions available** for the assist handle to be conveniently placed by the operator. Either position is at a most comfortable handling position from the valve handle.

The **plastisol** covering the handle transmits very little heat. The plastisol gives a more comfortable grip to the tool.

The **wheel guard** is adjustable. By loosening the clamp screw the guard may be rotated to any convenient position.
